

SANKALP JADHAV

Python Developer | Java Developer | Web Developer

Email: sankalpjadhav2409@gmail.com — Phone: +91 8010411324 — Location: Pune, Maharashtra, India

LinkedIn: linkedin.com/in/sankalpjadhav24 — GitHub: github.com/sankalpjadhav24

PROFESSIONAL SUMMARY

Motivated Computer Engineering student specializing in Python application development, modular software design, and Machine Learning algorithms. Proficient in PyTorch, NumPy, Pandas, and Object-Oriented Architecture. Hands-on experience developing AI time-series prediction models, algorithmic game engines, and resilient data processing pipelines. Strong problem-solving mindset focused on clean code execution, automated testing, and performance optimization.

TECHNICAL SKILLS

- **Primary Languages:** Python 3, Java, C++, SQL, HTML5, CSS3, JavaScript
- **AI / ML & Analytics:** PyTorch, NumPy, Pandas, Scikit-learn, Matplotlib, MinMaxScaler
- **Software Architecture:** Object-Oriented Design (OOD), Minimax Search, Heuristic Algorithms, Tkinter GUI
- **Developer Tools & Systems:** Git, GitHub, Linux/Bash, VS Code, PyCharm, Jupyter Notebooks

EDUCATION

SAVITRIBAI PHULE PUNE UNIVERSITY (DPCOE)

Pune, Maharashtra, India

Bachelor of Engineering (B.E.) in Computer Engineering

Expected Aug 2027

- **Academic Standing:** Cumulative Grade Point Average: 6.00 / 10.00
- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Web Technologies.

SOFTWARE PROJECTS

MindWar Arena — Modular Strategic Game Engine | Python, OOP, Minimax, Automated Testing

[GitHub Link](#)

- Designed modular board game platform in Python supporting 9 deterministic strategy games with custom heuristic evaluation.
- Implemented Minimax search algorithm with alpha-beta pruning to simulate intelligent opponent decision-making loops.
- Built automated unit test suite validating state transition integrity, turn enforcement, and edge-case game resolution.

StockMarket AI — Deep Learning Trend Forecaster | Python, PyTorch, LSTM, Pandas, Tkinter

[GitHub Link](#)

- Developed time-series deep learning model in PyTorch employing LSTM layers for stock price movement analysis.
- Preprocessed historical financial datasets using MinMaxScaler, engineering technical indicators (SMA, RSI) for training.
- Integrated evolutionary algorithm for portfolio weight optimization and constructed interactive Tkinter GUI interface.

FinXpert — Financial Analytical Platform | Python, Java, APIs, Data Pipelines, Git

[GitHub Link](#)

- Collaborated in a 3-member engineering team during FinEdge Hackathon to build a real-time financial analytical dashboard.
- Integrated market volatility index feeds and engineered failover data caching pipelines to maintain system resilience.

ACTIVITIES & LEADERSHIP

- **National Service Scheme (NSS):** Active student volunteer; organized rural development camps, community welfare initiatives, and social awareness drives across local districts.
- **College Cybersecurity Club:** Active student member; participated in technical workshops covering network security fundamentals, ethical hacking concepts, and OS hardening practices.
